

BIOPSY DEVICES AND METHODS

Abstract

5 An improved system for mammography analysis and methods of using
the same. In one aspect, a clip comprises a first portion and at least one
additional second portion connected to the first portion, the first and second
portions adapted for elastic deformation for engaging tissue. In another aspect,
an improved actuator for performing a breast biopsy is used to deploy a clip.
In yet another aspect of the invention, there is contemplated a system for
10 marking an evacuated breast cyst.
